Technologies & Skills

Frontend | React.js • Next.js • Redux • ChakraUI • Tailwind • MaterialUI • Formik • Yup

Backend | Node.js • Express.js • Mongoose • Sequelize • JWT • express-validator • Jest • AWS

Databases | MongoDB • MySQL • PostgreSQL

Additional skills | Jira • Trello • Git • Cloud Deployment • Testing • Ágile methodologies • Coworking

Certifications

Responsive Web Design
— at FreeCodeCamp (July, 2021)

JavaScript Algorithms and Data Structures
— at FreeCodeCamp (November, 2021)

Front End Web Development Ultimate Course 2021
— at Udemy (Marzo, 2022)

Escuela de Javascript
— at Platzi (Mayo 2022)

Aceleracion Fullstack
— at Alkemy (Julio, 2022)

LUCIANO SANCHEZ

FULLSTACK WEB DEVELOPER

CAREER OBJECTIVE

I am fascinated by everything related to software development, especially web development. Being aware of the latest technologies and techniques to deliver top-notch products is my goal. I plan to deepen and perform in roles such as front-end, backend, or fullstack. AWS is what I'm presently learning to move into specific positions such as DevOps or Cloud Engineer.

FREELANCE PROJECTS

• Planeta Burger Full-Stack Developer (January 2023 - March 2023, 2 months)

Planeta Burger is a virtual hamburger store, the customer can create, edit and add comments to his order. At the end send your order by WhatsApp to place the order. Products are loaded into Google sheets and brought to the client using ISR (Incremental Static Regeneration).

- UI Redesign in components such as: navigation bar, product card, order modal and drawer. UI changes such as fonts, sizes, color and more.
- Refactoring of the code structure and its global context to allow adding individual comments for each order.
- Monitoring of bugs and fixing of various clients bugs.
- Increased traffic and improved page rankings through improved website structure and search engine optimization (SEO).

Stack | • Next.js • Typescript • ChakraUI • Google Sheets

• Armoniface Full-Stack Developer (November 2022 - January 2023, 3 months)

Armoniface is an e-learning platform for a team of dentists dedicated to facial harmonization created from scratch. Within the application the user can view the acquired courses. Teachers or administrators have access to a backoffice where they can manage users, create and assign courses, publish news, etc.

- Created of a user-focused and responsive interface design so that the user can view available courses, purchase them and learn by viewing them in a user-friendly way. Selection of fonts, sizes and colors .
- Developed of views such as index, courses, profile, backoffice. As well as visual components such as home, about us, backoffice, tables and more.
- Created role-protected routing to disallow access to unregistered users and users without administrator privileges.
- Developed the content management system so that the administrator user can create/remove/edit/update users as well as assign courses to them.
- Integrated connection to the cloud database. Implementation and planning of model schemas defined for user/course/topic. Added validation for client form entries

Stack | • Next.js • Typescript • ChakraUI • MongoDB Atlas • Mongoose
